

Keep Your Lone Workers Safe In The Field

Give your workforce a faster, reliable way to signal for help from your team or law enforcement.

AlertMedia helps you protect your distributed workforce 24/7, wherever they are—in the office after hours, at an isolated job site, or alone in a high-risk environment. Our all-in-one safety solution provides everything you need to keep your people safe and connected to immediate support when in danger.

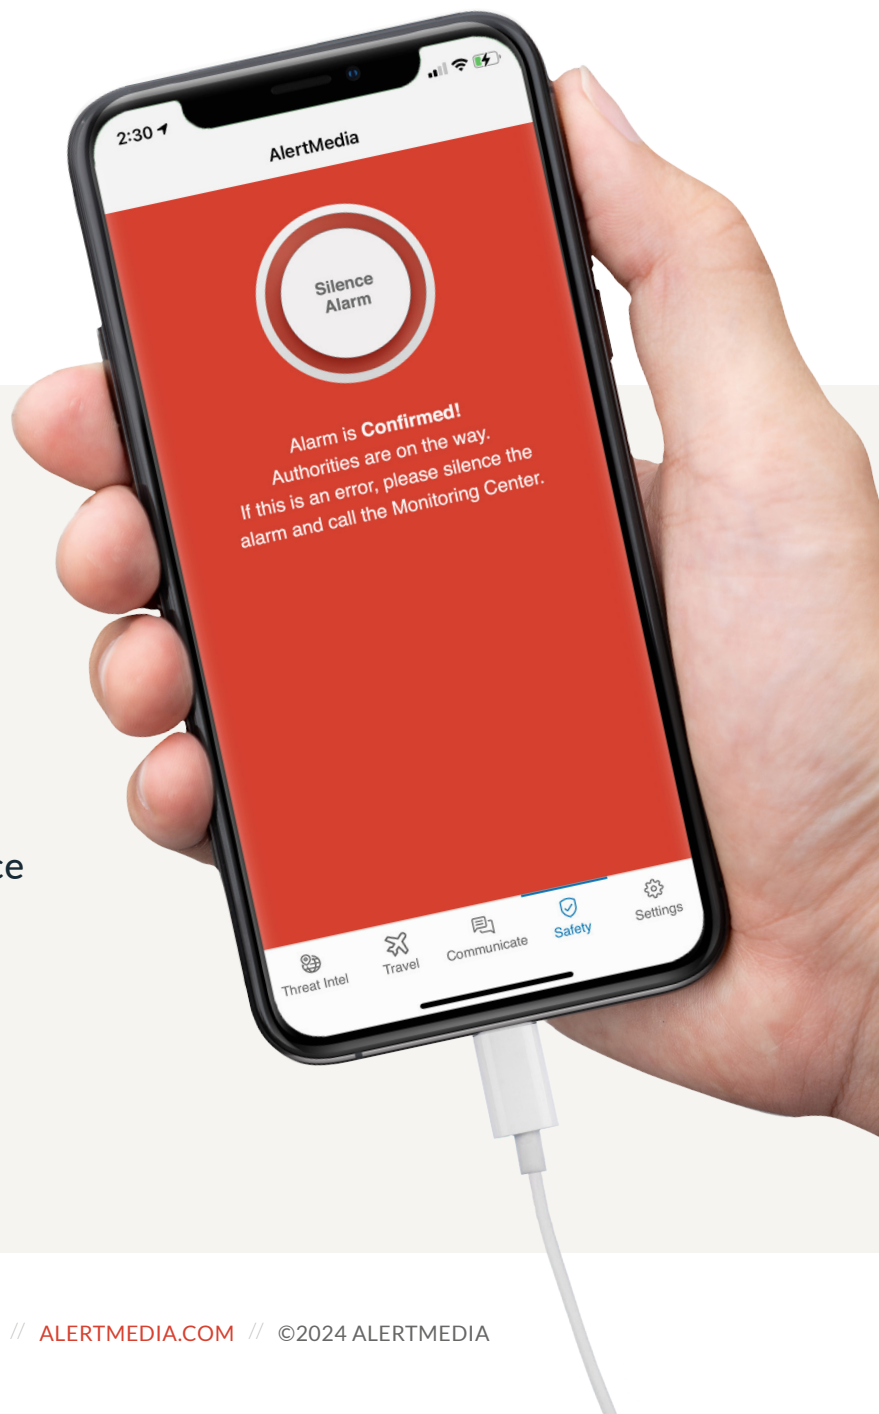

Signal for help in seconds with the pull of a tether

Quickly communicate with your organization's safety leaders to request assistance

Avoid dangerous situations with access to location-aware threat intelligence

Employee Safety Monitoring

Turn every employee's mobile phone into a discreet and powerful distress signal.

Timed Monitoring Sessions

Automatically receive alerts while simultaneously notifying law enforcement if employees are unable to confirm their safety before their timed session expires.

- Collects contextual notes about employees' location for responders
- Sends geolocation breadcrumbs every 20 seconds
- Continues session countdown even with no cell signal

One-Touch Distress Signal

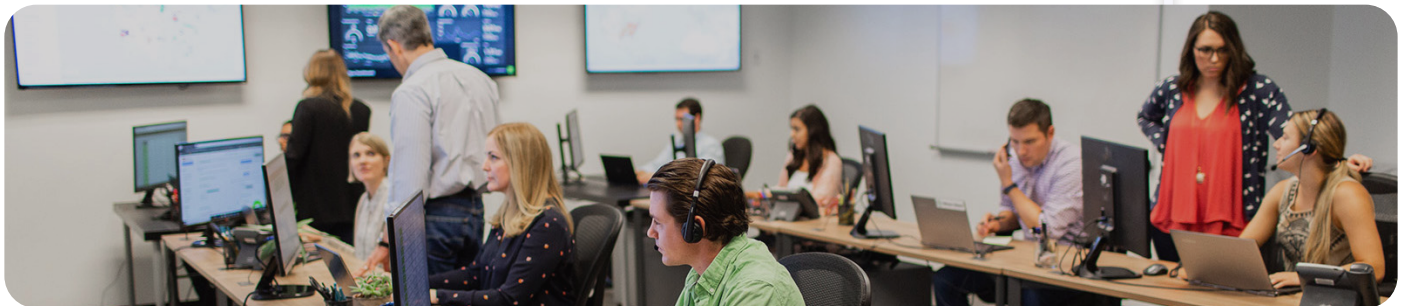

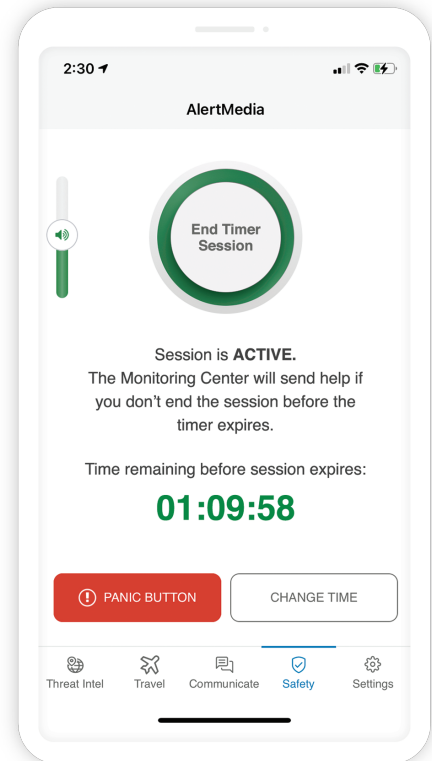

Arm employees with a reliable, discreet panic button that alerts our 24/7 monitoring team to send help to their exact location.

- Works on iPhone and Android devices
- Deters aggressors with an optional audible alarm
- Monitors and shares employees' exact locations even as they move

Zero-Button Tether Pull

Give employees a quick way to signal for help by simply pulling a tether or headphones from their phone jack.

- Allows them to signal from a locked phone screen
- Provides a discreet way to signal to avoid escalating the situation
- Works with anything that plugs into your phone jack

Customized Action Plans

Work with your dedicated success manager to develop response workflows for our monitoring team to follow.

- Outlines a scenario-specific workflow for our monitoring team to execute
- Allows for internal team alerting or escalation to law enforcement
- Details any specific information we might need to collect from your people

24/7/365 Monitoring Team

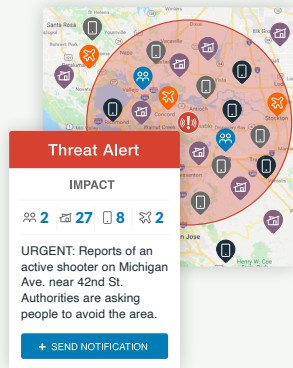

Ensure a rapid response to safety incidents around the clock with the support of a highly-trained response team that works with responders to get employees help faster.

- Includes former 911 dispatch security leaders
- Operates 24/7/365 from our Austin, TX headquarters
- Act as an extension of your team to provide your people with live support

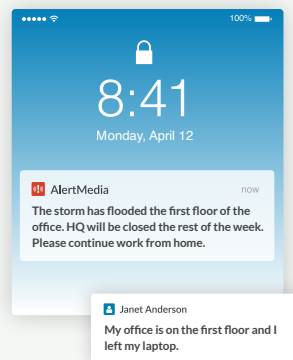

Keep Your People Informed and Connected

Give employees access to location-aware threat intelligence and a reliable way to communicate with your organization.

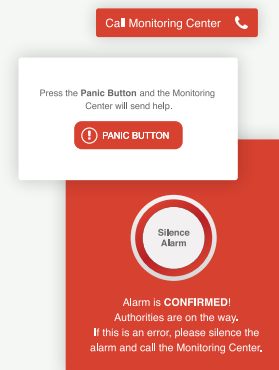

Threat Intelligence

Keep your people informed of severe weather and nearby incidents that present risks to their personal safety or ability to perform service.

Emergency Communication

Make it easier for managers and safety leaders to connect with a dispersed workforce with a reliable two-way communication solution.

Employee Safety Monitoring

Give your employees a fast and reliable way to report incidents or request help from your organization or law enforcement.

Trusted By Thousands of Leading Organizations

We serve customers across all industries, including local municipalities, healthcare providers, non-profits, manufacturing, energy and utilities, and more.
